local estimation
Sim 2: τ²=0.018, ε=1
Sim 2: τ²=1, ε=1
Sim 9: heavy-tailed site effects
Sim 9: outlier at the smallest hospital (that hospital)
Sim 9: outlier at the largest hospital (that hospital)
Sim 12: 3 dishonest hospitals, lie of 8τ
Sim 12: 3 dishonest hospitals, lie of 30τ
Sim 13: 80% of links fail each round, T=60
Sim 8: logistic, τ²=0.05
Sim 8: logistic, τ²=0.5
Sim 10: logistic, case-mix shift 1.0
Sim 11: anchor wrong by 2 s.d.
Sim 7: logistic, strict budget ε=0.3
Sim 15: iterative baselines, τ²=0.05
Sim 15: iterative baselines, ε=0.3
Sim 15: regional heterogeneity
Sim 15: anchor wrong by 1 s.d.
